

RAJAT RAI

Senior Software Engineer | .NET Developer

Nagpur, India | +91-82374-17701 | rajatrai159@gmail.com

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 4+ years of experience designing and building production-ready enterprise applications using .NET, ASP.NET Core, MVC, and Web APIs. Proven track record of delivering scalable systems for government, banking, and fintech sectors. Expert in API development, system integration, database optimization, and clean architecture. Passionate about writing maintainable code that solves real business problems.

CORE EXPERTISE

Backend: .NET, .NET Core, C#, ASP.NET MVC, Web API, Entity Framework, LINQ

Database: SQL Server, T-SQL, Stored Procedures, Query Optimization

Frontend: JavaScript, jQuery, HTML5, CSS3, Bootstrap, AJAX, JSON

Tools: Visual Studio, Git, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Trust Fintech Limited

2022 — Present | Nagpur, India

- Designed and deployed 5+ REST APIs for banking operations with comprehensive logging, error handling, and documentation
- Integrated Core Banking System (CBS) for real-time financial data sync, reducing data inconsistencies by 90%
- Led Recovery Management System (NPA) from architecture to deployment, tracking portfolio of ₹50+ crore
- Optimized SQL queries and stored procedures, cutting report generation from minutes to seconds
- Mentored junior developers on coding standards, code reviews, and best practices

Software Engineer | Amantya Technologies

2021 — 2022

- Built Vehicle Bill Management System with end-to-end loan processing workflow for finance client
- Developed EMI calculation engine handling complex interest calculations with multiple repayment scenarios
- Created role-based dashboards with real-time data visualization for agents, managers, and admin
- Implemented AJAX-based dynamic forms improving UX and reducing page load times significantly

Software Developer | TSSIPL

2020 — 2021

- Developed PMEGP government portal handling thousands of employment applications with multi-level approval
- Integrated external government APIs for applicant verification and status synchronization
- Built reporting module for officials with exportable analytics and drill-down capabilities
- Implemented robust form validation and file upload handling for supporting documents

KEY PROJECTS

PMEGP (Prime Minister's Employment Generation Programme) — Government portal built with MVC architecture and API integrations. Streamlined application processing for thousands of beneficiaries with scalable system design.

Vehicle Bill Management System — End-to-end loan processing platform with automated workflow stages, EMI calculation engine, document management, and real-time status tracking.

Recovery Management System (NPA) — Banking recovery platform with CBS integration, recovery agent assignment, legal notice generation, and recovery progress analytics.
